

# AAIC Mongolia

- Mongolia is a country with enormous growth potential as it sits on an estimated \$2 trillion pool of natural resources. These resources include coal, copper, fluorite, gold, iron ore, lead, molybdenum, oil, phosphates, tin, uranium, and wolfram
- As a result, the mining sector is hugely influential in Mongolia, with one mine alone, Oyu Tolgoi, reported to have the potential to boost the national economy by a third
- AAIC Mongolia is a privately held fund that invests directly in the Mongolian Stock Exchange (MSE), in private equity in Mongolia and in international entities that have their primary operations in Mongolia
- The fund invests across a range of industries, from cement manufacturing to fire protection to logistics companies. It does not invest directly in mining activities, but in supporting industries and sectors that are positively impact by the growth of mining
- By investing through the MSE and spending time on the ground in Mongolia, we have confidence that our investments are supporting legitimate businesses with long term aspirations
- With limited liquidity in the market, AAIC Mongolia's substantial portfolio offers excellent exposure to the growth that Mongolia is destined for
